

CSR Activity Report: Flood Relief Support – Khalsa NGO

Introduction:

At Kshema, we stand firmly with communities during times of crisis. In response to the devastating floods that impacted over 15 districts and damaged vast stretches of farmland in Punjab, we partnered with Khalsa Aid to support ongoing relief and rehabilitation efforts. This initiative reflects our commitment to social responsibility and community welfare.

Objectives:

Our primary goal was to assist farming communities in restoring their livelihoods by providing essential resources for field rehabilitation. This aligns with our CSR objectives of disaster relief, socio-economic support, and sustainable recovery.

Implementation:

We collaborated with Khalsa Aid under their project *Murh Vaseba 2025* in Gurdaspur district. The project focuses on supplying farmers with diesel and necessary tools to clear sand, mud, and silt from their fields, enabling them to resume agricultural activities. Regular progress updates and expense tracking have been planned to ensure transparency and accountability.

Impact:

This initiative has helped farmers begin the process of reclaiming their land and restarting cultivation. By addressing immediate needs, we are contributing to food security and economic stability in flood-affected regions. The project also strengthens community resilience and fosters hope for a sustainable recovery.

Conclusion:

Through this project, we reaffirm our dedication to supporting communities during emergencies and enabling long-term recovery. Together with Khalsa Aid, we are working toward restoring livelihoods and building resilience for the future.
